PROFESSIONAL SUMMARY

Backend-focused Software Engineer with 3+ years of experience developing SaaS, ERP and logistics platforms using Java Spring Boot, Go and .NET.

Experienced in building secure REST APIs, authentication systems, real-time data streaming and cloud-native backend architectures.

Strong background in full product lifecycle, from system design to production deployment.

CORE TECHNICAL SKILLS

Backend: Java (Spring Boot, JPA, Hibernate, JWT, WebSocket), Go (Gin, Echo), .NET Core

APIs: REST, SOAP

Databases: MySQL, PostgreSQL, MSSQL, MongoDB, Redis

Cloud & DevOps: AWS, Huawei Cloud, Docker, Jenkins, GitHub Actions

Frontend: React, Next.js, TypeScript, Tailwind

Tools: Git, Linux, Jira, Agile/Scrum

LANGUAGES

- Turkish - Native
- English - Fluent
- Spanish - Intermediate

EDUCATION

BSc, COMPUTER SCIENCE

Ozyegin University | 2017-2023

High School, Math Science

Ted Antalya College | 2013-2017

PROFESSIONAL EXPERIENCE

Software Engineer - Equrye Taşımacılık | 03/2025 - Present

- Designed and developed full-stack B2B and B2C logistics platforms, including admin dashboards, customer-facing interfaces and core operational workflows using Go, Java Spring Boot, React and Redux.
- Built a real-time tracking system leveraging Java Quarkus, WebSocket, Redis and a custom UDP server for high-frequency data streaming.
- Implemented scalable B2B integrations with e-commerce platforms and enterprise partners through REST APIs.
- Improved system responsiveness and operational workflows by introducing Redis-based caching and background processing pipelines

Tech Stack: Go, Java (Spring Boot, Quarkus), React, Redux, Redis, WebSocket, AWS, Huawei Cloud, Docker

Software Engineer – Likom Yazılım | 10/2024 – 03/2025

- Developed ERP backend services integrating marketplaces such as Trendyol and Amazon with shipping companies.
- Implemented REST and SOAP Web Services for order, product and cargo workflows using .NET Core.
- Implemented scalable B2B integrations with e-commerce platforms and enterprise partners through REST APIs.
- Optimized API communication flows between marketplace and logistics platforms to improve data consistency and system reliability.

Tech Stack: C#, .NET Core, REST, SOAP, PostgreSQL

Software Engineer – Tekno A Technology | 02/2023 – 10/2024

- Designed and developed a company-wide CRM and internal operations platform using Java Spring Boot, Express.js and React.
- Built RESTful APIs and backend services with Spring Boot and Node.js to manage customers, products, maintenance workflows and internal support tickets.
- Implemented secure authentication and role-based authorization mechanisms with JWT across multiple services.
- Led deployment of backend services to on-premise data center infrastructure.

Tech Stack: Java Spring Boot, Node.js (Express.js), React, MySQL, MongoDB, JWT, Docker

Software Developer – Garanti BBVA Technology (Internship) | 2022

- Designed and implemented REST APIs using Java Spring Boot within enterprise-scale banking systems.
- Worked with Jenkins-based CI/CD pipelines and secure development standards in a large corporate environment.
- Collaborated with senior engineers following Agile/Scrum methodologies.

Tech Stack: Java Spring Boot, Jenkins, REST, Git, Agile/Scrum
